

Some of the region's top photographers choose their favourite shots

JOHN BODDY

Work history: The 41-year-old has been a photographer for five years. Studied photography during school/college and through the British Institute of Professional Photography.

Specialism: Wedding photography, studio and environmental portraiture and commercial.

Chosen photograph: The light and colours of autumn create a fantastic backdrop and highlight one of the many amazing parks and open spaces we have in the North-East. This was taken at Preston Park last year. I particularly like the shadows and scale of this photograph. The way the light creates a glow around the two children also helps to add to the overall atmosphere.

Camera: Canon 1dmark3. **Lens:** 70-200L
Tel: 01642-787761; reflectyourlife.co.uk
